EDUCATION

B.S. Computer Science, State University | Expected May 2025 | GPA: 3.4

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Operating Systems

EXPERIENCE

Software Engineering Intern, DataFlow Systems | Summer 2024

- Developed a feature for the analytics dashboard using React and Redux to display real-time metrics
- Fixed 12 bugs in the backend API (Java/Spring) and wrote unit tests for each fix
- Collaborated with a team of 5 engineers to implement a new data export module
- Improved query performance by optimizing SQL queries, reducing load time from 8s to 3s

Junior Developer, University Web Services | Sept 2023 – May 2024

- Maintained and updated department websites using HTML, CSS, JavaScript
 - Implemented a form validation system that reduced support tickets by ~20%
 - Assisted in migrating legacy code from PHP to Python Flask
 - Documented 15+ internal tools and created troubleshooting guides
-

SKILLS

Languages: Java, Python, JavaScript, SQL, C++

Frameworks/Tools: React, Node.js, Spring Boot, Flask, Git

Databases: MySQL, PostgreSQL, MongoDB

Other: REST APIs, Agile/Scrum, Linux, Docker (basic)

PROJECTS

E-Commerce Search Engine | React, Node.js, PostgreSQL

- Built a search-optimized product filter system for an online store
- Implemented full-text search reducing user query time by 40%
- Designed database schema and wrote optimized queries

Weather Dashboard | Python, Flask, React

- Created a personal weather app that displays forecasts from multiple APIs
 - Used caching to reduce API calls and improve response time
 - 500+ lines of code on GitHub with documentation
-

LEADERSHIP & INVOLVEMENT

- Google Student Club: Organizer (2024–present)
- Hackathon Participant: 3 events; won “Best Social Impact” award at Local Hack Day 2023
