

Career Fair Guide

Computer Science Internships and Entry-Level Roles

Reviewed: September 12, 2026

How to read this guide: The jobs below are titles and career paths to search for or ask a recruiter about. They are not a promise that every title is open today; openings, locations, eligibility rules, and recruiting cycles change. Government, defense, and military employers may have citizenship, background-investigation, clearance, service, or work-authorization requirements.

Day 2 - Construction | Computer Science

#	Organization	What it does	Potential CS internship or entry-level roles
1	Epic	Epic develops electronic health-record and healthcare software used by hospitals and health systems. Its roles mix software development, implementation, customer problem-solving, infrastructure, training, and product design.	From the fair list: Project Manager (#19220), Quality Manager (#19242), Trainer (#21716), Integration Solutions Engineer (#30063), Integration Project Engineer (#30064), Infrastructure Engineer (#23505), Technical Solutions Engineer (#742), and User Experience Designer (#752). Also search Software Developer and the Software Development Internship .
2	Fast Enterprises	FAST builds and implements software that modernizes government systems, including tax and benefits administration. New hires commonly combine configuration, programming, requirements work, testing, training, and client support.	Implementation Intern and Implementation Consultant are the two best matches and were listed on FAST's official careers site during this review.
3	Garmin	Garmin designs connected products and software for aviation, automotive, fitness, outdoor, and marine markets. Its college internship program includes summer and some year-round opportunities.	Software Engineering Intern; Embedded Software Engineer; UI or Front-End Developer; Mobile App Developer; Test/Quality Engineer; Data Engineer or Analyst.
4	Sandhills Global	Lincoln-based Sandhills operates information platforms and online marketplaces for agriculture, construction, transportation, aviation, and other equipment markets. Its Technology & Development area explicitly covers software, databases, and networking.	Software Developer or Intern; Mobile Developer; Database Developer/Administrator; Network or Systems Engineer; Data Scientist Intern; Web/UI Developer.
5	RentVision	RentVision is a Lincoln software and digital-marketing company whose platform helps multifamily property operators forecast vacancy risk and coordinate advertising, websites, pricing, and analytics. Its careers page accepts general applications even when no matching position is posted.	Software or Web Developer; Data Analyst; Marketing Analytics or SEO Technology; QA/Test; Product Support. No dedicated CS opening was visible on the official page during this review , so bring a résumé and ask about future engineering or analytics hiring.
6	Don't Panic Labs	Don't Panic Labs is a Lincoln software engineering and product-development consultancy that builds new products and helps organizations improve engineering practices. Its teams include software engineers, architects, designers, and project integrators.	Software Engineering Intern; Entry-Level Software Engineer; QA/Test Engineer; UX/Product Designer; Technical Project Integrator.
7	Vertiv	Vertiv makes power, cooling, monitoring, and infrastructure systems that keep data centers and communications networks running. Its early-career programs recruit computer science students, and its engineering organization includes software and firmware work.	Software/Firmware Engineering Intern; Embedded Software Engineer; Controls or Monitoring Software Engineer; Data/Analytics Intern; IT or Cybersecurity Intern.
8	Nebraska Office of the Chief Information Officer	Nebraska's OCIO provides shared enterprise IT services for state agencies, including applications, networks, infrastructure, security, and customer support. Positions are generally posted through the Nebraska State Jobs portal .	IT Applications Developer; IT Analyst; Network/Infrastructure Technician; Cybersecurity Analyst; Service Desk Technician; Data Analyst; state IT intern or apprentice.
9	Kiewit	Kiewit delivers large construction and engineering projects in transportation, power, water, industrial, and other infrastructure markets. Its corporate and project teams use analytics, project controls, digital construction, and enterprise systems at large scale.	Data Analytics Intern; Business Intelligence Analyst; IT Intern; Application Developer; Project Controls/Data Analyst; VDC/BIM or Construction Technology Intern.
10	Columbus Area Chamber of Commerce	The chamber supports economic, workforce, housing, and business development in the Columbus, Nebraska area and maintains local job and internship resources. It is better viewed as a connector to member employers than as a large internal software employer.	Possible internal paths: Digital Communications/Web Intern; CRM or Membership Data Intern; IT Support. Also ask for introductions through its Job Board and Internship Opportunities resources.
11	Gallup	Gallup combines global polling, workplace research, analytics, and advisory services, supported by data platforms and software products. Its internship program places students on real client and internal projects.	Data Science or Statistical Research Intern; Software Engineer; Data Engineer; Product Analyst; UX Research/Design; Cybersecurity or IT Intern.
12	FBI	The FBI investigates federal crimes and national-security threats and employs civilian professionals in technology, cyber, data, intelligence, and digital forensics. The Honors Internship Program is the principal student route.	Honors Intern; Computer Scientist; IT Specialist; Cybersecurity Specialist; Data Analyst; Digital Forensics Examiner; Intelligence Analyst. U.S. citizenship, a Top Secret clearance, polygraph, and other eligibility rules apply.

#	Organization	What it does	Potential CS internship or entry-level roles
13	Nelnet	Lincoln-based Nelnet operates education-finance, payments, banking, telecommunications, and technology businesses. Its job portal regularly includes early-career technology work; a Software Engineer Intern was visible during this review.	Software Engineer Intern; Entry-Level Software Engineer; Data Analyst or Data Engineer; ServiceNow/IT Analyst; Cybersecurity Analyst; QA Engineer.
14	Nebraska Public Power District	NPPD is Nebraska's public electric utility, operating generation, transmission, distribution, and related energy systems. Its internship/co-op program places students on real projects, including technical and business work.	Cybersecurity Intern; IT/Application Development Intern; Data Analyst; Network or Systems Intern; OT/SCADA Technology; GIS Analyst.
15	EF Johnson Technologies	A JVCENWOOD company, EF Johnson builds mission-critical radio and P25 communications systems for public-safety and government users. Its engineering work spans embedded software, radio systems, networking, security, and field integration.	Software Engineering Intern; Embedded Software Engineer; DSP Software Engineer; Network Security Engineer; QA/Test Engineer; Project Implementation Engineer.
16	Fiserv	Fiserv builds payments, banking, commerce, and financial-services technology. Its student program includes summer internships for technology majors working on real fintech projects.	Technology Summer Intern; Software Engineer or Application Developer; Data Analyst/Engineer; Cybersecurity Analyst; Cloud/Site Reliability Engineer; QA Automation Engineer.
17	WoodmenLife	Omaha-based WoodmenLife provides life insurance, retirement products, and member/community programs. Its home-office internship program includes business and technology placements; current search results showed Software Engineer and AI Engineer internships.	Software Engineer Intern; AI Engineer Intern; Data/BI Analyst Intern; QA Automation Intern; Information Security Intern; Systems or Business Analyst.
18	U.S. Army Corps of Engineers - Omaha District	The Omaha District delivers civil works, military construction, environmental, water-resource, and infrastructure missions across a large geographic area. USACE hires students through the federal Pathways Internship Program and USAJOBS.	Student Trainee (Information Technology or Computer Science); Computer Scientist; GIS/Data Analyst; Software Developer; Cybersecurity or IT Support Intern. Federal eligibility and possible clearance requirements apply.
19	FNBO	First National Bank of Omaha is a regional bank and payments company whose digital products depend on software, data, security, cloud, and enterprise technology. Its official careers site promotes internship and development programs for students and recent graduates.	Technology Intern; Software Engineer; Data Analyst or Data Engineer; Cybersecurity Analyst; Cloud/Platform Engineer; Product or UX Intern.
20	Nebraska Department of Health and Human Services	Nebraska DHHS administers public-health, Medicaid, behavioral-health, child-and-family, and other statewide services. The agency lists IT and statistics as business-operations careers, and its internship areas include public-health informatics.	Public Health Informatics Intern; Data/Statistics Intern; IT Analyst; Applications Developer; Reporting/BI Analyst; Information Security Analyst.
21	Crete Carrier	Crete Carrier is a Lincoln-headquartered trucking and logistics group that operates across the lower 48 states. Its paid internship program explicitly includes Information Technology, operations, and supply chain.	Information Technology Intern; Data Analytics Intern; Application/Support Analyst; Network or Systems Intern; Cybersecurity Intern; Logistics Systems Analyst.
22	Lincoln Electric System	LES is Lincoln's community-owned electric utility. Its careers site separates Technology (IT/OT) from engineering and offers internships and co-ops tied to students' majors.	IT/OT Intern; Application Developer; Cybersecurity Analyst; Network/Systems Administrator; Data Analyst; SCADA or GIS Technology Intern.
23	Buildertrend	Omaha-based Buildertrend develops an all-in-one construction-management platform for residential builders, covering schedules, financials, customer communication, payments, and AI-assisted workflows. Its official site described a Software Engineering Internship building production features.	Software Engineering Intern; Associate Software Engineer; Web or Mobile Developer; QA Automation Engineer; Data/AI Intern; Product or UX Intern.
24	PenLink	PenLink builds AI-powered digital-intelligence and investigation software for law enforcement, national security, government, and enterprise users. The platform combines digital evidence, OSINT, data analytics, communications, visualization, and generative AI.	Software Engineer; Data Engineer or Analyst; Machine Learning/AI Engineer; QA Automation Engineer; Cloud/Security Engineer; Technical Support Engineer. Some customer-facing roles may require background screening or clearance eligibility.
25	Shyft Solutions	Omaha-based Shyft Solutions develops weather, cloud, data-center, and mission software for U.S. government and defense customers. Its internship program describes real Air Force projects, and its careers site includes software openings.	Software Developer Intern; Full-Stack Software Engineer; Cloud/DevOps Engineer; Data Engineer or Weather Analytics Developer; Cybersecurity Engineer. Citizenship or clearance eligibility may apply to government projects.
26	Union Pacific	Union Pacific operates a major freight-rail network and uses technology to automate and provide visibility across transportation and logistics. Its official site currently lists both Summer Technology Intern and year-round technology paths in Omaha.	Technology Intern; Application Developer; Cybersecurity Intern; Infrastructure/Platform Intern; Data Science Intern; Entry-Level Software Engineer.
27	Scoular	Omaha-based Scoular manages agricultural commodities, ingredients, and global supply chains. Its paid early-career programs include summer internships and a two-year new-graduate Pathways program with an Information Technology track.	IT Intern; Data Analytics Intern; Software or Data Engineer; Product Development Intern; Business Intelligence Analyst; Systems or Cybersecurity Analyst.

#	Organization	What it does	Potential CS internship or entry-level roles
28	DMSi	Omaha-based DMSi develops inventory and order-management software for lumber and building-material suppliers. Its career families include product/design, software development, R&D, systems engineering, quality, implementation, and support.	Software Development Intern or Entry-Level Developer; QA Analyst; Systems Engineer; UI/UX or Product Intern; Implementation Consultant; Technical Support Analyst.
29	Hudl	Lincoln-founded Hudl builds video, data, analytics, AI, smart-camera, scouting, recruiting, and fan-engagement products for sports organizations. Its job families include engineering, product, design, and data-intensive work.	Software Engineer Intern or Graduate Engineer; Data Scientist/Analyst; Computer Vision or ML Engineer; Product/UX Intern; Embedded/Camera Software Engineer; QA Engineer.
30	Nebraska Medicine	Nebraska Medicine is an academic health system with hospitals, clinics, research, patient portals, telehealth, and extensive clinical information systems. Its careers page includes IT under corporate/admin roles and supports non-clinical student placements.	IT Support or Infrastructure Intern; Clinical Applications Analyst (including Epic); Healthcare Data/BI Analyst; Cybersecurity Analyst; Informatics or Data Intern; Integration Developer.
31	Farm Credit Services of America	FCSAmerica is a cooperative lender serving farmers, ranchers, and agribusinesses. Its paid summer program explicitly lists technology services in software, data engineering, operations, and product development.	Software Engineer Intern; Data Engineer or Data Analytics Intern; Product Development Intern; Cybersecurity Intern; Infrastructure/Cloud Intern; Business Systems Analyst.
32	Eaton	Eaton is an intelligent power-management company serving electrical, aerospace, vehicle, and industrial markets. Its early-talent tracks include Information Technology and Engineering & Technology, each with internships and full-time development programs.	IT Intern in Cyber, Data Science, Software Engineering, UX, or Product/Project Management; Embedded Systems Intern; Firmware/IoT Developer; Web/Mobile Developer; Engineering & Technology Leadership Development Program.
33	Ameritas Life Insurance Corp.	Lincoln-based Ameritas provides insurance, employee benefits, investments, and retirement plans. Its careers page identifies Technology as a hiring area and highlights a large internship program.	Technology Intern; Software/Application Developer; Data Analyst; IT Infrastructure Intern; Cybersecurity Analyst; Business Systems Analyst.
34	BNSF Railway	BNSF operates a major freight-rail network, while BNSF Tech builds the software and infrastructure behind rail logistics. The technology organization covers product engineering, platforms, data and AI, hybrid cloud, enterprise engineering, and cybersecurity.	Technology Intern; Product or Software Engineer; Platform/Cloud Engineer; Data/AI Intern; Cybersecurity Intern; Infrastructure or Enterprise Systems Engineer.
35	Mutual of Omaha	Mutual of Omaha provides insurance and financial products and runs a sizable technology organization modernizing digital customer and business systems. Its IT careers page highlights software, data, systems, cloud, and technical training paths.	IT or Software Engineering Intern; Application Developer; Data Analyst/Engineer; Systems Engineer; Cloud Engineer; Cybersecurity or QA Automation Analyst.
36	MITRE	MITRE is a nonprofit public-interest technology organization that operates federally funded R&D centers and works on national security, aviation, healthcare, cyber, and other complex problems. It hires 500+ interns and co-ops annually across many technical majors.	Software or Computer Science Intern; Cybersecurity Intern; Data Science/Statistics/Operations Research Intern; AI/Robotics Intern; Computer Engineering Intern; New-Grad Software or Systems Engineer.
37	H&R Block	H&R Block provides tax preparation and financial technology through retail and digital products. Its corporate technology careers include an Associate Software Engineer path supported by the 12-month Accelerate development program.	Associate Software Engineer (Accelerate); Software Engineer Intern; Data Analyst; QA Automation Engineer; Cloud/DevOps Engineer; Product or UX Intern; Security Analyst.
38	Clark Construction Group	Clark is a large U.S. general contractor that delivers complex buildings and infrastructure and recruits interns and entry-level professionals. For a CS student, the closest paths sit in data, digital construction, business systems, and corporate technology.	Data Analytics Intern or Analyst; Business Intelligence Analyst; VDC/BIM or Construction Technology Intern; IT Support/Systems Analyst; Cybersecurity Intern. Ask the recruiter which titles are housed centrally versus on project teams.

Day 3 - Engineering | R&D

Repeated organizations contain exactly "See Day 2 description."

#	Organization	What it does	Potential CS internship or entry-level roles
1	Garmin	See Day 2 description	
2	Fast Enterprises	See Day 2 description	
3	Epic	See Day 2 description	
4	Valmont	Valmont designs and manufactures infrastructure products such as utility and lighting structures and precision-irrigation systems.	Software Engineering Web or Mobile Intern; Business/Data Analytics Intern; IoT or Embedded Software Engineer; Cloud/Data-Center Intern; Cybersecurity or IT Analyst.
5	Lincoln Electric System	See Day 2 description	
6	Ingredion	Ingredion produces starches, sweeteners, nutrition ingredients, and other food and industrial ingredient solutions; its careers site has both Digital Technology Solutions (IT) and Internship & Early Talent teams.	Data Analytics/BI Intern; IT Intern; Data Engineer; Business Systems Analyst; Cybersecurity Analyst; Manufacturing Automation/OT Analyst.
7	Altec	Altec designs, manufactures, and services equipment for utilities, telecommunications, contractors, and tree-care markets.	Current internship examples: Information Services Software Development , Quality Assurance , and IT Helpdesk internships, plus broader engineering co-ops.
8	HOA Solutions	HOA Solutions is a Lincoln-based water and wastewater systems integrator specializing in SCADA, PLC programming, HMI configuration, telemetry, drives, instrumentation, and control panels.	Possible openings: SCADA Developer, PLC Programmer, HMI Programmer, Design Engineer, and Project Management as possible openings; ask whether it can structure an internship or trainee role.
9	U.S. Army Corps of Engineers - Omaha District	See Day 2 description	
10	Signetik	Signetik is a Lincoln embedded-systems and IoT design company working with wireless modules, embedded Linux, firmware, hardware, cloud services, and mobile/web applications.	Embedded Firmware Intern/Engineer; Embedded Linux Developer; Cloud/Web Developer; Mobile Developer; Hardware/Test Engineer. Its careers page showed no junior technical opening during this review, so ask about internships or a general engineering application.
11	U.S. Navy	The Navy operates worldwide military, intelligence, cyber, communications, and information systems; these are uniformed service careers rather than conventional corporate internships.	Cyber Warfare Engineer , Cyber Warfare Technician, Information Systems Technician, Cryptologic Warfare Officer, and Communications Systems Warfare Officer; citizenship, aptitude, medical/fitness, service-commitment, and clearance requirements vary.
12	Nebraska Public Power District	See Day 2 description	
13	Sandhills Global	See Day 2 description	
14	Columbus Area Chamber of Commerce	See Day 2 description	
15	HDR	Employee-owned HDR provides architecture, engineering, environmental, and construction services and pairs interns with project teams on real work.	IT Intern; Data Analytics or GIS Intern; Computational Design/BIM Developer; Software/Automation Developer; Cloud/Cybersecurity Intern; Business Intelligence Analyst.
16	Empirical Foods	Empirical Foods is a technology-focused food manufacturer with production, engineering, technical, professional, and student-program career areas.	Software Engineering Intern; IT/Systems Intern; Data Analyst; Industrial Automation or Controls Intern; Cybersecurity Intern; Manufacturing Systems Analyst.
17	Hormel Foods	Hormel Foods is a global branded-food company whose operations depend on enterprise technology, analytics, supply-chain systems, manufacturing automation, and digital products.	IT Intern; Data Analytics Intern; Software or Business Systems Intern; Supply Chain Analytics Intern; Cybersecurity Intern; Automation/OT Technology Intern.
18	Carlson School of Management	Carlson is the University of Minnesota's business school, not a corporation; it teaches and conducts research in business, analytics, AI, information systems, and related fields.	Student IT Assistant; Web/Application Student Developer; Data or Research Assistant; Analytics Lab Student Consultant; Teaching/Research Data Assistant. Many student jobs require current University of Minnesota enrollment.
19	Union Pacific	See Day 2 description	
20	The Toro Company	Toro develops turf, snow, irrigation, underground-construction, and other outdoor-equipment technologies across brands such as Toro and Ditch Witch.	Hardware and Software Engineering Intern; Embedded Firmware Intern; Robotics/Autonomy Intern; Spatial Data R&D Intern; Data or Business Analyst Intern; IT Systems Intern.
21	Eaton	See Day 2 description
